

# NORTH STAR OPENS FIVE FEET GOOD MILLING ORE

## Big Tonnage Assured From Mizpah Fault Ledge On 1000 Level

### Fifteen Die From Exposure In An Open Boat After Suffering Tortures for Over Two Weeks

(By Associated Press.)  
HALIFAX, N. S., May 18.—The U. S. revenue cutter Seneca arrived today with four survivors of the burned steamer Columbian whom she picked up from a small lifeboat yesterday. The condition of the men is serious. Little could be learned from them beyond the fact that they were tossed helplessly by the seas since May 4th, when fire drove them into a lifeboat. Fifteen men were in this boat. Eleven died from hunger and exposure. Day after day desperate attempts were made to attract the attention of passing ships. During the first two days three steamers were sighted, but none saw them. Hope of rescue was fast vanishing, and the men lost courage. Some drank salt water and one became insane and died. All ate shoe leather. One by one the men gave up until only five remained. Peter Trel died as aid was in sight. The captain and others of the crew were rescued two days after leaving the Columbian.

### REMODELED TONOPAH BIG MILL IN TIME TO AVOID INJUNCTION

Mr. J. S. Austin, president of the Tonopah Mining company, and Charles R. Miller, one of the directors, who enjoys the distinction of being governor of Delaware, left Tonopah yesterday morning in the private car Mizpah, after making a thorough examination of the company's property both here and at Millers. Previous to coming here the gentlemen visited the Nevada Wonder and expressed themselves eminently pleased with what they saw and the operations of the properties committed to their care.

"We are especially pleased with the remodeling of the big mill at Millers," remarked President Austin. "In view of the fact that the company had just completed the work when we were notified of injunction proceedings to restrain us from employing certain devices claimed by the Moore company in connection with the filtering process. By the changes we made the patents over which there has been a conflict have been eliminated and the company is free from all entanglements of the law. We began this work about four months ago and have just completed it. By the changes installed we expect to raise the extraction from 89 to 92 per cent and derive as much revenue from milling 12,000 tons a month as we did from treating 15,000 tons by the old process."

"No, I cannot say there are material changes contemplated in the policy of the company, which is on a very satisfactory basis. In the Sand Grass we have a great deal of territory to explore and after a while we will probably sink a mine to catch the Murray ledge. This will save us the expense of sinking the shaft and crosscutting 200 feet and the results will be the same."

"What is the sentiment of the east about mining investments?" "I cannot say that the inquiry is very keen. We are not speculators and take no interest in the movements of speculators, but recently I was told by a former president of the Toronto Mining Stock exchange that there was scarcely anything doing in Cobalt or Porcupine. Those issues were carried to an extreme and companies were organized for the purpose of flating stocks that had no standing in legitimate mining. You may talk of the Goldfield and Tonopah excitement, but this gentleman told me that they were as nothing compared to the craze in Toronto."

"Are there any special developments with the subsidiaries of the Tonopah Mining company?" "The Tonopah Placers company has probably got the three dredges in operation for the summer season and the company will have a handsome revenue from that source. In Nicaragua we do not propose to do much until we choose to exercise our option."

### SUSTAINS SCALDING WHEN COFFEE UPSET

COOK AT BUTLER TAKEN TO THE COUNTY HOSPITAL FOR TREATMENT.

Frank Hardwick, a cook employed at the camp boarding house at Butler in the Goldfield district, arrived here yesterday morning suffering from serious burns that extended from the shoulder to his waist. He was removed to the county hospital by Deputy Billy Walker. Hardwick arrived at Butler a short time ago from Altamira, near Randsburg, Cal., and found employment in the kitchen. Last Saturday some of the other employees were scuffling around the stove when they knocked Hardwick over on the hot range and upset a large coffee pot, allowing the contents to flow over one side of the cook, whose body was covered with an immense blister when he arrived. While the injury is extremely painful, there is no danger unless blood poisoning should set in.

### ONE OFFICER HOLDS UP A BAD GANG OF HIGHGRADERS

PRIVATE DETECTIVE RECOUNTS A HAIR-RAISING EXPERIENCE IN THE DARK OF THE MOON.

Under the heading of "Recovers Ton of Stolen Ore," The Goldfield Tribune regales its readers with the alleged exploit of a detective who, single-handed, held up a gang of Tonopah high graders in their cabin and recovered "a ton of rich ore that had been stolen from the mines of Tonopah and Goldfield." The story goes on to recite that it is likely that the arrest of 12 miners, mostly of Tonopah, will follow as the detective is alleged to have a mass of evidence on the operations of the gang. The account is a regular thriller. The detective declares he went to the cabin occupied by the high graders and found seven robbers guarding the treasure. Two had revolvers, but they were so taken by surprise that the detective had no trouble in compelling them to hold up their hands while the sleuth, single-handed, searched each of the seven men. Considering the recovery of the ore more important than the capture of the thieves, the "men were permitted to leave the cabin and temporarily make their escape, since the officer was without aid to march them to the county jail."

The value of the ore is estimated to be \$3,000, as it took three automobiles to remove it from the cabin. The strangest part of the narrative is that neither the sheriff's office nor the Tonopah chief of police or any of his officers who patrol the neighborhood in question were advised or asked to assist in the capture of such a desperate gang.

### CRAZED BY GRIEF BECOMES SUICIDE

VETERAN AND AN OFFICERHOLD-ER SHOTS AND KILLS HIMSELF.

(By Associated Press.)  
OREGON CITY, May 18.—James Pardee, whose mind was unbalanced by the recent death of his wife and his defeat for county treasurer at the primaries Friday, shot and killed himself at his home in Gladstone. He was a civil war veteran and treasurer of Gladstone for more than a year.

A store that advertises must be a store of values—of "bargains"—or the advertising would not pay.

### FIVE AVIATORS DIE IN GERMAN MILITARY CONTESTS

ONE MOTOR EXPLODES AND ANOTHER MONOPLANE IS CAPSIZED.

(By Associated Press.)  
FRANKFURT-ON-THAINE, May 18.—Another fatal accident occurred today in connection with the Prince Henry aviation competition at Darmstadt. Lieut. Rehede, flying as a passenger with Lieut. Kolbe, was killed when the monoplane was capsized. Kolbe died later. Lieut. Mueller was killed yesterday when the motor exploded.

HALBERSTADT, Prussian Saxony, May 18.—Lieuts. Wiegandt and Filling were killed yesterday when they attempted a landing with a military aeroplane.

### WEDDING SURPRISE SATURDAY NIGHT

MARRIED ON THE QUIET, BUT GIVEN A RECEPTION SUNDAY MORNING.

Jack Murphy, one of the delegates to the Eagles state convention, prepared a surprise for his friends Saturday night, but was surprised yesterday morning when he arrived at the railroad station to find half a hundred ladies and gentlemen all anxious to testify their appreciation of putting one over by showering rice. Mr. Murphy was around early Saturday evening visiting friends, but said nothing about a marriage he had arranged for that evening. His secret kept until he tried to get away with his bride, and then came the climax of old shoes and rice. The marriage took place at the Catholic parochial residence at 9 o'clock with Father Flynn officiating. The bride was Miss Mary Cox, a sister of George Cox, a lady of charming personality. The attendants were Miss Kate Schoen and Mark Page. Mr. Murphy is a machinist employed at the Belmont and a son of the late J. D. Murphy, who up to the time of his death was superintendent of the Mizpah mine and one of the most estimable citizens of Tonopah. The bridegroom is past worthy president of Tonopah aeris, F. O. E. No. 271. Mr. and Mrs. Murphy will be at home to their friends on Mizpah hill after a short honeymoon.

### FAREWELL CONCERT GIVEN BY MRS. SOLLENDER-HANBY

The farewell concert given yesterday afternoon at Knights of Columbus hall by Mrs. Lenore Solender-Hanby was a great treat to the select audience that assembled there yesterday afternoon. Mrs. Hanby rendered the following solos: "Open Secret," Humington Woodman; "Lullaby," "Indian Song," "I Wonder if Ever the Rose," "Aria" from Samson and Delilah, Saint-Saens; "Life's Epitome," Kenneth Ray; Mamma di te Moi, Visions by D'Hardelot. Mr. Goldenboth and Mr. Schmitt each played a solo and together gave an arrangement of the Pagliacci polka.

### OHIO COAL MINES ORDERED TO STOP

(By Associated Press.)  
COLUMBUS, May 18.—Orders declaring a strike of all coal miners in the Ohio fields were issued today from headquarters of district six of the United Mine Workers.

### HUERTA WILLING TO RESIGN IN THE INTEREST OF PEACE

MEDIATORS AUTHORIZED TO MAKE AN EXTREME CONCESSION.

(By Associated Press.)  
WASHINGTON, May 18.—General Huerta has authorized the Mexican mediators to submit his resignation if necessary to a settlement of the peace negotiations, according to dispatches from a competent diplomatic source in Mexico City.

Information of Huerta's attitude agrees with the view obtained by close friends of the Mexican delegates during their visit to Washington. According to this view the delegates realized the present administration in Mexico City is fast going to pieces and it is inevitable that Huerta give place to some other authority.

Who will come after Huerta, whether individually or a professional commission, is an open question, but it is gathered that succession is not likely to fall on military leaders who have gained prominence "by arbitrary force."

LOS ANGELES, May 18.—General Telles, federal commander at Mazatlan, offered to surrender the remnant of his troops, provided they are accorded the honors of war by General Obregon, according to advices received here by constitutionalist representatives. The telegram said also a rebel aeroplane wrecked La Pedra fort, Mazatlan, killing twenty federals.

### DELEGATES OF F. O. E. FOR RENO MEETING

TONOPAH AND GOLDFIELD SEND DELEGATIONS TO THE STATE CONVENTION.

Delegates from Tonopah and Goldfield left yesterday morning to attend the grand aeris that meets in Reno this morning. Owing to the short notice of reduced railroad rates the attendance from the southern camps will not be as great as expected a few weeks ago. Among those who went out were Jack Thompson, deputy grand president of the grand lodge, of Goldfield; Emmet Walsh, candidate for president; Jack Murphy, N. M. McCormick, Charles Richards, state secretary; J. A. Sanders, alternate for Letson Balliet; W. B. Evans, state secretary, and Henry Kelly.

Had there been timely notice of the rates it was the intention of Goldfield to send the drill team and drum corps.

### SHIPS HALF TON MILK TO MANHATTAN BY MAIL

The utility of the parcel post in the distribution of merchandise was illustrated yesterday by the shipment of 185 cases of condensed milk to Manhattan. The shipment went through the local postoffice from a Reno wholesale house. Each case weighed 50 pounds and the consignors were kept busy pasting stamps on the parcels.—Reno Journal.

### THE TEMPERATURE.

Highest temperature yesterday, 73; a year ago, 76. Lowest temperature last night, 53; a year ago, 39.

## SPLENDID REVENUE PROMISED BY RECOVERY OF LOST LEDGE IN THE INTERMEDIATE LEVEL

Manager John W. Chandler has opened five feet of good milling ore one the intermediate level of the North Star, between the 950 and 1,050-foot levels, and the ore body gives every sign of permanency. The ore came in last Saturday, but Mr. Chandler refrained from making the

fact public until he found beyond a doubt that he had an ore body and not an elusive deposit that would blow out with the next round of shots. He is satisfied with the appearance and extremely hopeful of a continuation.

President Herman Zadig, who had

been notified of the find, arrived yesterday and lost no time in establishing a personal acquaintance with the ledge. After spending some time underground he confirmed the report that had come current during the day. The ore was found on the 1,000-foot level, where they had cut the Mizpah fault, and is likely to expand with depth, which should continue to the 1,130 and 1,150 levels. The ledge was found while driving east and parallel the famous Belmont vein.

This is the second strike made on the North Star within a week. Last Thursday the south crosscut on the 1,130-foot level opened the downward extension of the Footwall vein, showing a width of eight feet between walls and the prospect of widening with depth between the North Star fault on the west and the Mizpah fault on the east. These faults diverge and the Footwall vein, which measured only two feet on the upper levels, is growing steadily with depth.

Mr. Zadig is also well pleased with the outlook on the Rescue-Eula, which he says has all the earmarks of a good mine, needing only more development. He looks forward to the Rescue catching two more veins now developed in the Jim Butler and thinks that will furnish the next good news for the camp.

### SAVAGE TO CLOSE DOWN.

The directors of the Savage Gold and Silver Mining company met in the company's San Francisco office Monday and decided to shut down the mine indefinitely. President H. L. Slosson, Jr., who is now in the east, and Vice-President Goldman were appointed as a committee to devise ways and means for liquidating the company's indebtedness.

A device to push a printer's hands out of the way of danger when feeding a platen press has been patented in the United States and England by an English inventor.

### PRESS AGENT ON STAND TELLS OF A MURDER PLOT

ORDERED BY BECKER DAY BEFORE CRIME TO PREPARE ALIBI.

(By Associated Press.)  
NEW YORK, May 18.—Charles Plitt, former press agent and adviser of Charles Becker, former police lieutenant, on trial for the murder of Gambler Herman Rosenthal, as a witness for the state, corroborated many details of the stories told by Jack Rose and others, that Becker was instigator in the murder plot.

Witness swore he met Becker after the murder. Becker was indignant over the way the killing was accomplished. Plitt quoted Becker as saying: "To pull the stunt the way they did was bad. One would suppose it was being done for moving pictures."

Plitt said he saw Becker the day before the murder. "Becker told me that he and I had to have an alibi for that night."

### TONOPAH MASONS HOLD RECEPTION

W. M. DAVID, GRAND MASTER, MAKES HIS OFFICIAL VISIT.

Mr. W. M. David, most worshipful grand master of Free and Accepted Masons of the State of Nevada, Mr. Walter E. Pratt, worshipful grand senior deacon and Mr. Thos. Lindsey, worshipful grand junior deacon, paid their official visit to Tonopah lodge of Free and Accepted Masons on Friday, May 15th. The following day the three made the trip to Goldfield for the purpose of paying an official visit to Montezuma lodge and were accompanied from Tonopah on this trip by Messrs. Dewar and Arnold.

Mr. David was banqueted both at Tonopah and Goldfield. Mr. David is well known in a business way throughout the mining camps, being auditor of the Nevada industrial commission.

### TONOPAH INDIAN BATTERY PROVES INVINCIBLE IN BOX

Tonopah town team won yesterday from the Goldfield boys by a score of 9 to 4 and a return game has been arranged in Tonopah next Sunday. The local boys had their Indian battery with them and the reds knocked 18 Goldfielders out of the box. The Tonopah boys think they have some find in the material picked up among the wandering Shoshones.

### K. M. SIMPSON RETIRES FROM THE ATLANTA MINE

K. M. Simpson, general manager of the Wingfield properties at Goldfield outside the Consolidated, resigned Friday and will remove to San Francisco with the intention of opening an office. He is succeeded by Arthur I. D'Arcy, who will also assume charge of the Merger Mines company.

Proof of labor blanks for sale at the Bonanza.

### SUBVERSIVE OF SELF RESPECT TO FAVOR A REPEAL

UTAH ORATOR SCORES THE ADMINISTRATION ON CANAL TOLLS BILL.

(By Associated Press.)  
WASHINGTON, D. C., May 18.—Senator Sutherland, of Utah, said in the senate that in the history of free government no such astounding proposition ever before had been presented to that great legislative body as the demand of the president that congress should repeal the tolls exemption law. "Without raising the question whether we were right or wrong," he said, "to comply with the request would be so utterly subversive of every consideration of self-respect, that even those who intend to capitulate will raise a question and make a pretense of justifying their action on defensive grounds before acceding to the president's request."

Senator Sutherland said he intended to vote against repeal, although he favored arbitration.

### VICIOUS STALLION ALMOST KILLS MAN

SAN FRANCISCO, May 16.—F. E. Veltner was riding a horse along a road near Daly City yesterday when a stallion in a pasture jumped the fence, sank his teeth into Veltner's leg and dragged him out of the saddle.

## LIPTON YACHT IS ALMOST READY TO SLIP FROM THE WAYS TO WATER

(By Associated Press.)

NEW YORK, May 18.—The fourth and most important to date of the many international sports competitions in which the experts of the United States and England meet this year will begin tomorrow with the playing of the English amateur golf championship tournament over the course of the Royal St. George Golf club at Sandwich. For this golf classic of the old world America has made the most representative entry in its history, and the spirit of seeking new fields to conquer is most commendable, since there was no organized effort in this direction, each of the dozen or so American entrants competing as individuals. That under these conditions the foremost amateur players of this country should be eager to pit their skill against the best golfers of England, continental Europe and even far away Australia speaks well for their spirit of sportsmanship and their belief in their ability to hold their own against the golfers of the world.

With the America's cup defending candidates launched and tuning up preparatory to the initial practice races on June 2, the attention of yachtsmen is turning toward the challenger Shamrock IV. Despite the secrecy and conflicting reports from Gosport it is known that the Lipton yacht is almost ready for her slide from ways to water. According to those privileged few who have viewed the challenger, the Shamrock IV is a boat of extreme type, departing from many of the orthodox yacht building principles and lacking in

many respects the attractive lines that have marked challengers and defenders in the past. In fact, one English authority terms it as distinctly ugly.

Designer Nicholson intimated some months ago that the challenger would show some radical departures from conventional type, and judging from comment in English yachting circles only an exhibition of remarkable speed in light winds will be accepted as justifying this extreme style of design. One description states that she is several feet wider in beam than the American yachts; square stemmed, exaggerated at the bow and carrying an extreme mast and sail area. Still another authority writes: "The vessel is of composite construction, being built with some frames of an aluminum alloy called navalium and others of steel; whilst her skin is of three thicknesses of wood and the deck of two-ply wood. Her spars are hollow and built of wood. The hull of the yacht is far from being what yachtsmen are accustomed to call a pretty form. The waterline will be 75 ft., but the overall length, despite of a snubbed stem and a sawn-off transom, will probably exceed this figure by 60 per cent. If the sheer is hogged no scientist will be surprised. The vessel, too, is sure to have tumble-home sides, but the extent to which they may be employed in the challenger for the America's cup will cause the vessel to be regarded as a freak of an extreme type. The yacht will be fitted with a dagger-plate centerboard, and her sail area will be immense and of building principles and lacking in executive bold."
